Defect No.	Defect Description	Test Case	Severity
1	In the main web page,clicking on the Up arrow on a post to like it causes the number of votes of that post to decrement. Also, clicking multiple times will change it multiple times instead of once	34	1
2	In a post web page, clicking on “Delete” button under your comment does not delete the comment.	35	2
3	In a post web page, clicking on Up arrow on a comment to like it causes the number of votes of that comment to decrement.	37	2
4	When the user enters text in the dialog box and presses the “Post” button, a error message appears. So, no message is posted.	39	1
5	When the user presses the “Add Emojis” button, the popup dialog to choose emojis does not appear. So, no emojis can be selected and posted.	40	3
6	In the main web page, when the user presses the “help” button, nothing happens.	41	2
7	In the main web page under Post History, all posts have zero votes even after liking or disliking them.	Checking votes in Post History.	3
8	In the main web page, the loading animation persists forever even after the page has been loaded.	Checking animations in main page.	3
9	When user click on sign out button, nothing will happen and user can still go back to post page.	Log out account	1

10	The user will be signed in automatically if the browser remembered the password. So user can not change to the other account to log in unless he or she clean the cookie and history.	Log in account	2
11	The number of reports of a post already reach a threshold but it will not be deleted automatically.	45	2
12	There is not report button under the comment, so user can not report a comment	47	2
13	The comments will never be deleted automatically since there is not report button.	48	2
14	All the post are ordered from low score to high score but it should be order in descending order(high score to low score)	49	1
15	User cannot receive notification even if his or her post is in the TOP list	50	2
16	User cannot receive notification even if his or her post got lots of up vote	51	2
17	The user's points is deducted when user vote other's post but it should be increased.	52	1
18	When clicked on the yellow star icon to favorite a post the star won't turn to yellow.	16	2
19	When the star icon clicked the post won't appear on the favorites tab at all. So nothing can get in the favorites tab, and nothing that is in the favorites tab can get out. Yellow/White star button is not working.	16	1
20	The web app doesn't accept any new comments at all, it always shows "please enter valid characters".	18	1
21	The web app accepts NULL text and posts it on the feed.	20	2
22	Even though the there are comments for a post it shows 0 comments.	When a comment is entered for a specific post and then checked	1

		the total number of comments.	
23	When clicked on the refresh button the spinner icon to load won't show up.	25	3
24	A picture can't be uploaded to a post it repeatedly pops up a error message (5 times).	27	2
25	When clicked multiple times to settings button, on the settings view enable notifications button turns to disable notifications.	32	3
26	When clicked on newest button to sort the posts according to their creation time, the order is not from newest to oldest.	Checking the post order when clicked to the newest button.	3
27	There is no image icon for a specific user, it shows a blank square, instead of showing a unique icon image for a user on a post.	Checking the user icon in the post when a post is posted.	3
28	Add post with no data. System should respond "no data", but there's another error "cannot read history".	2	1
29	Add post with 1 or more data also fails. System should add post or say "too short", but instead it shows cannot read.	3	1
30	Delete account button doesn't delete the account it simply signs out the user. Delete account, then log in back still works.	9	2
31	Delete account should delete all relevant data, such as posts, when the account is deleted the posts related to the deleted account still remains.	8	1
